DEFINITION
Under direction from the Health and Safety Supervisor, performs a variety of environmental compliance activities and permitting associated with District facilities, equipment, and operations; performs a variety of hazardous materials management program compliance activities associated with District facilities, equipment, and operations; as required, provides technical and operational support for emergency preparedness and response program activities; recordkeeping and reporting; participates in the District's emergency planning processes; may exercise technical and functional oversight over support staff; and performs other related work as required.

DISTINGUISHING CHARACTERISTICS
Environmental Specialist I is the entry level in the professional Environmental Specialist series. Under close to general direction within a framework of established policies and procedures, incumbents learn and perform a variety of routine and specialized tasks associated with environmental compliance. Provides support for programs and projects specific to the District's emergency preparedness and response to environmental/hazardous material activities and programs. Assignments are given in specific terms and are subject to frequent review while in progress and upon completion, except where tasks are well defined by established standards, policies and procedures. There is limited latitude for independent judgment. As experience and proficiency are gained, assignments become progressively more diversified and difficult with less supervision.

This class is distinguished from the journey-level Environmental Specialist II class by the routine nature and limited complexity of work assignments and the level of supervision received. The Environmental Specialist I and II classifications are flexibly staffed. Incumbents normally advance to the Environmental Specialist II classification after gaining requisite experience, demonstrating sustained satisfactory performance, achieving and demonstrating proficiency in the job requirements of the journey-level classification and upon recommendation and approval of the immediate supervisor and department manager.

Environmental Specialist II is the experienced, journey-level in the professional Environmental Specialist series. Under general direction within a framework of established policies and procedures, incumbents perform a full range of assigned difficult and complex tasks, while exercising discretion and independent judgment within established guidelines. Assignments are generally reviewed upon completion; difficult and non-routine assignments may be reviewed while work is in progress.

The Environmental Specialist II is distinguished from the Environmental Specialist I class by the complexity of work assignments, the potential impact of error, the level of initiative and judgment exercised and the level of supervision received. The Environmental Specialist II is distinguished from the Health and Safety Supervisor in that the latter manages the District's environmental
合规程序和人员，包括这一分类。

**TYPICAL DUTIES**
**TYPICAL EXAMPLES OF DUTIES MAY INCLUDE BUT ARE NOT LIMITED TO THE FOLLOWING:**

- Implements environmental compliance programs, policies, and procedures to ensure the District's compliance with all applicable federal, state, and local regulations pertaining to wastewater, recycled water, potable water, hazardous waste/materials, and biosolids.

- Prepares regulatory permits as required by applicable law and regulations; obtains data from various sources, compiles, and completes required permit applications; provides recommendations for permit language during permit application and approval processes.

- Assists with the development and maintenance of standard operating procedures related to environmental compliance; gathers, interprets and communicates environmental regulations pertinent to District operations; assists with the development and presentation of training to insure compliance with environmental regulations including reporting and recordkeeping requirements.

- Conducts internal inspections and participates in compliance audits; evaluates, determines, and reports on compliance status; investigates mitigation options and prepares reports and recommendations on actions required in response to compliance audits.

- Evaluates all District facilities and motorized equipment running on fossil fuels for compliance with relevant federal, state and local environmental compliance laws and regulations.

- Evaluates all District facilities for compliance with relevant federal, state, and local hazardous materials storage and handling laws and regulations; updates hazardous material business plans and hazardous spill response and cleanup procedures.

- Performs a variety of internal staff studies and analyses focused on environmental regulatory compliance; prepares reports outlining findings and recommendations; assists in the development and revision of related internal District policies and procedures; and coordinates preparation and submission of required written plans to regulatory bodies as required.

- Acts as resource person offering advice and consultation to District staff within area of expertise and program responsibility.

- Provides technical and programmatic support for the District's emergency preparedness and response program within area of expertise and program responsibility.

- Performs other related work as required.
REQUIREMENTS
Any combination of education and experience that would likely provide the required knowledge, skills, and abilities is qualifying. A typical way to obtain the knowledge, skills, and abilities would be the equivalent of:

Education and Experience:
Possession of a baccalaureate degree from an accredited college or university with a major in environmental science, environmental studies or a related technical field; and

Environmental Specialist I: No work experience required.

Environmental Specialist II: Two years of full time experience developing and implementing programs related to environmental compliance and hazardous materials management issues.

Knowledge, Skills and Abilities:
Knowledge of: environmental engineering principles, terms, practices and technology related to basic chemistry and laboratory procedures; methods, materials, and equipment used in the operation and maintenance of water facilities; methods and techniques of quantitative and qualitative data analysis, report preparation and procedure writing; federal, state and local laws, codes and regulation governing environmental and hazardous materials compliance; safe work practices as they relate to the position and the ability to identify workplace hazards and/or unsafe conditions and take appropriate action to correct same.
