Drought is here.
Take action today to start saving water at your homeowners association (HOA).

SAVE WATER INDOORS:
- Install low flow showerheads and faucet aerators - Residents can order a free Water Conservation Kit
- Check for leaky toilets – HOA’s and their residents can request dye tabs from ACWD to assist residents in checking for leaks
- Insulate hot water pipes so water gets hot faster and is not wasted
- Educate residents on water saving practices

SAVE WATER OUTDOORS:
- Use a broom instead of a hose to clean sidewalks, parking lots, and other hardscapes
- Remove lawn and install water-efficient plants – Rebates available!
- Water during the coolest parts of the day (early a.m. and late evening) and avoid watering on windy days
- Check irrigation system for leaks and repair broken sprinkler heads and broken irrigation pipes
- Use a hose nozzle on all outdoor hoses
- Use a cover or liquid barrier on pools and spas to limit evaporation

ACWD REBATES AND PROGRAMS
to help you and your HOA be water-efficient:
- Water-efficient landscape (turf conversion) rebates
- Weather-based “smart” irrigation controller rebates
- Landscape water use budgets
- Landscape water use efficiency survey

For more information on rebates, water supply updates, and conservation tips, please visit acwd.org/drought.
